

- General**
- Lacroux Streeb Lighting Design, based just outside of Aspen, Colorado, is pleased to offer Internships, Associate Lighting Designer & Project Management positions with our firm. We are accepting resumes from candidates who are passionate about lighting, have a strong technical background and can fulfill the requirements listed below.
- Education & Experience**
- Enlisted in or has a minimum of a 4 year degree from a major university in architectural lighting design or illumination engineering.
 - Programs currently used by our firm include AutoCAD, Revit MEP, Adobe Creative Suite, AGI32, Google Sketchup, and Microsoft Excel. We also use proprietary lighting control software by Lutron, Vantage, LiteTouch, and Crestron. All programs mentioned are not required to be considered.
- Duties**
- Work on and manage all facets of lighting design projects from concept through completion to produce lighting plans & details, photometrics, budget analyses, renderings & hand sketches, lighting fixture schedules & cut sheets, and electrical layouts/panel schedules.
 - Lighting control system design with several manufacturer's proprietary software to produce load and enclosure schedules, keypad designs and programming.
 - Construction Administration and On-site Services
 - Project management including correspondence such as phone calls, faxes, emails, sketches, meeting notes and other coordination with Project Teams.
 - Meetings on-site and on-site walkthroughs, mock-ups & exterior flagging for lighting fixture locations.
 - Final aiming including lighting control fine tuning and installing new lamps, lenses, filters, and gels.
 - Assistance with professional photographer on-site for completed projects.
 - Working with sales representatives and other distribution points for budgeting and pricing of complete lighting packages. Compile quotes, purchase orders, and invoices for all materials on projects.
 - General office assistance including organizing and cleaning.
 - Travel out of the Roaring Fork Valley and out of state will be required, generally with a 2-3 week lead time.
 - We are currently working towards a 4 day work week 7am to 6pm.
- Full Time Position Benefits**
- 2 weeks paid vacation per year
 - 5 paid sick and/or personal days per year
 - Health Insurance will be paid for by LS Lighting Design after 3 months probationary period expires
 - Health benefit funding including ski pass, health club membership, and other interests/activities
 - 401k plans are currently being researched and can be discussed after 6 months of employment
- Salary**
- Yearly salary and performance review
 - Bonuses based on merit
